

“Focus on the food, we’ll do the rest”

Weekly Activity Report of Team “PisicileSalbatice” for the period 30/03/26 – 12/04/26

Author: Boga Karla-Maria
Reviewer: Boga Karla-Maria
Approved by: Boga Karla-Maria

1. Activities and Results Achieved by the Team Leader:

Student: Boga Karla-Maria

Activity	Result	Time Spent
(1) Given task to Timeea to implement “Inventory Management” functionality	Timeea implemented the first version of “Inventory Management”	2 min
(2) Given task to Diana to implement “Billing & Payments” functionality	Diana started implementing “Billing & Payments” functionality	2 min
(3) Given task to Maria to sketch the “Graphical User Interface Design”	Maria started sketching	2 min
(4) Given task to Ada to research about test cases and unit tests	Ada started researching	2 min
(5) Given task to Ada to define test cases for “Inventory Management” functionality and “Graphical User Interface Design”	Ada created her first test case	2 min
(6) Given task to Timeea to create team logo	Timeea created team logo	2 min

(7) Created “Project Implementation Plan”	Karla created the “Project Implementation Plan”	1h
(8) Created GitHub repository and project	Karla created GitHub repository and project	30min
(9) Implemented “Staff management” functionality	Karla started implementing this functionality	4h

2. Activities and Results of the Developers:

Student: Gota Timeea

Activity	Number of Lines of Code Written ¹	Time Spent	Review
(1) “Inventory Management” functionality	136	3h	Very good, meets expectation and requirements
(2) Created team logo	it was done in Canva	30min	Well designed

Total functionalities implemented:

- Product filtering by category
- Show Data Grid View

Partially implemented functionalities:

- Add button for products
- Edit button for products
- Delete button for products

Student: Toader Diana

Activity	Number of Lines of Code Written ²	Time Spent	Review
(3) “Billing & Payments” functionality	290	4h	It is a very well designed feature, it meets all expectations and very pink

Total functionalities implemented:

¹ Empty lines of code and lines containing comments will not be counted.

² Empty lines of code and lines containing comments will not be counted.

- Total calculation based on quantity and price
- Edit order
- Discount calculation
- Payment options: cash (with computation of change) and card simulation

Partially implemented functionalities:

- Items in list are not yet introduced automatically

Student: Runcan Maria

Activity	Number of Lines of Code Written ³	Time Spent	Review
(4) Sketch the “Graphical User Interface Design”	It is done 40% of total of the entire project	1h30min	It is well structured, meets the requirement

3. Activities and Results of the Tester:

Student: Gherasim Paula-Alexandra (Ada)

Number of bugs identified: 0

Number of bugs fully resolved: 0

Number of bugs partially resolved: 0

***She did research about how is she going to approach testing and bugs. Moreover, there was no code provided by developers for her to test, only by the end of the week.**

She also created her first test case on GitHub

4. Research Activities and Results:

Articles, web pages, and tutorials studied:

Title and Author	Source (Web Link)	Number of Pages
“Test Case Templates with free Download and Examples” by Vijay	https://www.softwaretestinghelp.com/test-case-template-examples/	
“How to Write Test Cases in Software Testing”	https://www.geeksforgeeks.org/software-testing/test-case/
